

Data Sovereignty Violations

This report shows potential data sovereignty violations by listing all protected objects with backups or replicas residing in a different location. Supported platforms: VMware vSphere, Microsoft Hyper-V, Nutanix AHV, oVirt KVM, Red Hat Virtualization, Proxmox VE, VMware Cloud Director, Microsoft Windows, Linux, IBM AIX, Oracle Solaris, Mac.

Report Parameters

Infrastructure objects: Veeam Backup & Replication
Protection types: All items
Workload types: All items

Summary

Discovered data sources: 48
Target replication hosts: 2
Repositories: 19
Tape vaults: 1

Data Sovereignty

Backup Job Compliance

Backup Copy Compliance

Replica Compliance

Tape Backup Compliance

Objects with no Location Tag

Data Sovereignty Violations - Backup Jobs

vbr12.tech.local

Backup Server	Name	Location	Backup File Location	Backup Repository	Job Name
vbr12.tech.local	172.24.150.224	Undefined	Repo	Backup Repository (Windows)	Lin Backup Job
