

# Database Log Protection History

This report gives historical overview of all database log backup jobs including the list of protected and unprotected databases for each virtual and physical machine. Supported platforms: SAP HANA , Oracle RMAN, SAP on Oracle.

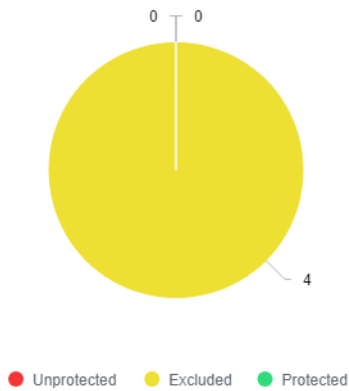

## Report Parameters

Infrastructure objects:	Veeam Backup & Replication
Databases types:	All items
Primary job types:	All items
Backup jobs:	All items
Interval:	Current month (9/1/2025 - 9/30/2025)

## Summary

Database log backup jobs:	2
Processed VMs:	1
Processed computers:	0
Processed application servers and clusters:	1
Processed databases and database instances:	4
Protected:	0
Unprotected:	0
Excluded:	4
Processed SQL databases:	4
Protected:	0
Unprotected:	0
Excluded:	4
